

Room Cc News!

The last two weeks in our classroom!

We've had another fun-filled two weeks of learning, exploring, creating and growing together! Our little learners have been busy using their senses, developing new skills, and enjoying lots of time with their friends.

Art & Creative Exploration

Our Toddlers practiced their fine-motor skills by using glue to decorate cookies and placing them on a cookie jar. This activity gave the children an opportunity to practice eye-hand coordination, grasping, and following directions while having fun with glue.

Our Infants and Toddlers explored squishy-bag painting while creating a beautiful wooden fall scene! The children used this hand and fingers to push, press and move the paint around the bag. As they explored, they discovered that mixing different colors creates brand new colors! This sensory experience encouraged cause-and-effect learning, color recognition, sensory exploration, and strengthening those little hand and finger muscles.

Our Toddlers also:

- *Decorated cars using colorful foam shapes, practicing fine-motor skills, shape recognition and creativity.

- *Enjoyed free art with chalk, making their own designs and marks.

Be sure to check out our hallway board, where you'll find the pumpkins, our children decorated. You can also check out classroom board, where you'll see the apples, they created. We are so proud of our little artists!

Outside and On the Move

Our Toddlers enjoyed some outdoor playtime with our Room Bb friends, they were climbing the climbers and going down the slides laughing and smiling. We love watching them have so much fun!

Our infants enjoyed a buggy ride, taking in everything around them and getting some fresh air. We love watching their little eyes take in the sights and sounds of the world around them!

Our Infants

Our Infants have been enjoying our new bouncers in the classroom! Bouncers let the babies safely explore movement while strengthening their developing muscles. You can always find them smiling or laughing as they bounce up and down.

Our Toddlers – Building and Learning

Our Toddlers have been busy building with our blocks. They love stacking the blocks higher and higher and then laughing when the they come tumbling down.

Building with blocks supports problem-solving, hand-eye coordination, spatial awareness and balance. The children are learning that when they build, move and experiment, they can discover what happens next!

Reminders

- Please check your child in on Lillio at drop off everyday. This is an important step to proper attendance records and counts in the classroom. We appreciate your attentiveness to this task.
- Please remember to fill up your child's water bottle each day
- If you haven't already, please send in a family picture for our family board. We love to bring a piece of home into our classrooms.

Infant Families – Please make sure all bottles and snacks are clearly labeled with your child's name and the date.

Toddler Families - If you have not already, please bring in a second sippy cup for your child to use for milk.

Cooler Weather – As the weather gets cooler, please send in a coat or jacket labeled with your child's name. Also, please be sure that you have a pair of socks with them each day. Sock with the rubber grips for in the classroom are preferred.

We're looking forward to another wonderful two weeks!

Love,

Room Cc Teachers
